Author's address: Dr. L. Somova, Research Group of Hypertension, Department of Medical Sciences, Bulgarian Academy of Sciences, Alexander Hospital, G. Sofiiski str. 1, *Sofia* (Bulgaria)

Amino-acid transport, as observed after injections of L-Arginine and L-Leucine in peritubular capillaries of the rat, 355.
Amino-acids and related substances, study of their dialysance, 440.
Ammonia production and glutamate metabolism in dog kidneys, 344.
Ammoniagenesis, distribution in rat kidney, 408.
Angiotensin, effect on blood pressure and renal function in pregnant and non-pregnant rats, 375.
Angiotensin resulting from unilateral kidney disease may affect contralateral renal function, 1.
Calcium concentration in the human renal papilla and the tendency to form calcium containing renal stones, 528.
Copper accumulation in patients undergoing chronic hemodialysis, 455.
Diabetes insipidus, pressure diuresis in dogs with –, 97.
Diatrizoate, renal transport in the rabbit, dog and rat, 156.
Diuresis in dogs with diabetes insipidus, 97.
Diuretics, effects after unilateral splanchnicotomy in the dog, 329.
Fanconi syndrome with renal tubular acidosis and light chain proteinuria, 103.
Focal glomerular alterations in the nephrotic syndrome in children, 382.
Furosemide, effect on residual nephrons of the chronically diseased kidney in man, 427.
Glomerular filtration rate, estimation using ^{51}Cr. EDTA, 147.
Glomerulonephritis, effect of long term high dose heparin treatment, 67.
Glomerulotubular balance in dogs with chronic salt retention, 46.
Glutamate metabolism and ammonia production in dog kidneys, 344.
Hemodialysis, an improved needle set for fistula –, 191.
Hemodialysis, cardiodynamic studies, 511.
Hemodialysis, copper accumulation in patients, 455.
Hemodialysis, dialysance of amino-acids, 440.
Hemodialysis, effect on erythrocyte and plasma potassium, magnesium, sodium and calcium, 81.
Hemodialysis, influence on total body potassium, 173.
Hemodialysis, venous autografts for –, 57.
Heparin treatment, effect on the course of chronic proliferative glomerulonephritis, 67.
Lipids in the serum after a fat load in patients with renal disease, 549.
Maleic acid and amino-acid transport, 367.
Medulla perfusion as studied by fine detail angiography in the dog, 317.
Mercury poisoning ($HgCl^2$), micropuncture study of renal tubular factors in low dose –, 221.
Mercury poisoning ($HgCl^2$) with maintenance of renal function in salt loaded rats despite severe tubular necrosis, 205.
Natriuretic activity of a substance isolated from human urine during the excretion of a salt load, 540.
Nephrotoxic serum nephritis, relationship of antibody localization to lesions, 566.
Osteodystrophy (renal) evaluated by thermolability of alkaline phosphatase, 270.
Palmitate, metabolic fate in the dog kidney in vivo, 488.
Papilla, renal concentration of calcium and the tendency to form renal stones, 528.
Para-aminohippuric acid, maximum tubular transport in sheep, 313.
Phosphatase (alkaline), thermolabile fraction in the evaluation of renal osteodystrophy, 270.
Polyneuropathy (acute) complicating chronic renal failure, 278.
Polyneuropathy (uremic), clinical aspects, 414.
Potassium (exchangeable) and renal po-

tassium handling in advanced chronic renal failure in man, 264.
Potassium (total body) in patients with chronic renal failure, 173.
Proteinuria, determination of selectivity using alpha-2-macroglobulin, 255.
Proteinuria (light chain) in Fanconi Syndrome with renal tubular acidosis, 103.
Pyelonephritis (experimental), determinants of susceptibility to enterococcal –, 109.
Renal failure (acute), effect of mannitol diuresis on enzyme activity of the rat kidney, 463.
Renal failure (acute), nosologic considerations in the nomenclature of –, 505.
Renal failure (chronic) and renal potassium handling, 264.
Renal function, one day testing in the rat, 235.
Renin, activity in human renal homotransplantation, 289.
Splanchnicotomy combined with diuretics administration in the dog, 329.
Sucrose nephrosis, with pinocytosis as a causal factor, 246.
Thermodilution (artérielle pour la mesure du débit sanguin rénal, 125.
Thermodilution method in the measurement of renal outflow in man, 17.
Transplantation (renal), serum renin activity in –, 289.
Triiodinated contrast media: influence on renal function, 559.
Tubular acidosis in Fanconi Syndrome with light chain proteinuria, 103.
Tubular necrosis ($HgCl^2$), maintenance of renal function in salt loaded rats despite severe –, 205.
Ultrafiltration of protein solutions, electrolyte transport during –, 473.
Vasodepressor lipid isolated from kidneys of hypertensive animals, 575.
Venous outflow (renal), measurement in man by the local thermodilution method, 17.
Washout technique (Xenon) in the measurement of intrarenal hemodynamics of the rat kidney, 33.
